HUMANISMO EVOLUTIVO TRANSPERSONAL

Educational Portal

Functional & Access Specifications

A client presentation reference covering the student experience, course structure, teaching tools and agreed school permissions.

4 initial courses	146 lesson pages	4 cumulative roles
Independent learning paths	Sequential access and saved work	Student, teacher, school and platform administration

Document purpose
This is the consolidated product specification, not a statement of production readiness. It distinguishes the working prototype from requirements approved in the October 22 roles interview.

Version 1.0 • October 22, 2026

Prepared for client presentation planning. Product interface labels remain in Spanish; explanations are in English.

01 / FUNCTIONAL SPECIFICATION

Product overview

A private learning portal that combines independent study with school-based support.

One learning record, multiple communities

Students access the same course material wherever they study. Their personal course progress follows their account across schools. School membership determines who may support them, not whether their learning history is retained.

Audience	Primary experience
Student	Personal dashboard, courses, lesson work, library and scheduled sessions.
Teacher	Classroom student roster, informational course progress and authorized attendance tools.
School administrator	School-wide visibility, teachers, classrooms, student placement and sharing settings.
Platform administrator	School creation, initial school administrator onboarding, oversight and school archiving.

Initial course offering

Course	Lessons	Session plan
Introducción a la filosofía de Yo Soy Nosotros	45	60 minutes per lesson
Introducción a Ecología y Espiritualidad	45	60 minutes per lesson
Introducción al Humanismo Evolutivo Transpersonal	45	60 minutes per lesson
El arte de ser empresario	11	120 minutes per lesson

Total: 146 lessons and 157 hours of planned session content. These hours describe the supplied curriculum, not measured attendance or tracked time on site.

Delivery baseline
A working local prototype exists. Classroom-scoped access, school-administrator governance and several interview requirements still need implementation and release validation.

02 / FUNCTIONAL SPECIFICATION

Student experience

The student landing page is **Mi aprendizaje**. Students never see other members or a member directory.

Prototype screen with local test data. Counts illustrate the interface, not client usage.

Dashboard item	Definition
In-person attendance	Attendance marks recorded by authorized teachers; target scope is Amigos que evolucionan only.
Courses with attendance	Distinct courses with at least one recorded in-person attendance.
Completed online lessons	Lessons finished through the online completion flow. Opening a lesson is not completion.
Courses with online participation	Courses with at least one completed lesson; completed-course totals are shown separately.

Each course card displays its title, completion status, completed/total lessons, percentage progress, eligible attendance count and a begin, continue or review action. Missing data is shown as unavailable rather than as a fabricated zero.

03 / FUNCTIONAL SPECIFICATION

Courses & lesson workspaces

Every course has its own program page. Every lesson has its own page and private work area.

Lesson section	Content
Class facts	Book, subject, source sections, duration and prerequisites.
Summary	Orientation to the lesson and the argument it develops.
Learning objectives	Capabilities the student should develop.
Key concepts	Terms and definitions from the supplied program.
Session development	The full supplied timed session plan and activities.
Reflection questions	Prompts for personal understanding and application.
Reading assignment	Preparatory reading or closing reading.
My work	A saved reflection/exercise field plus a review confirmation.

Current prototype completion rule

The student confirms they reviewed the contents and exercises and saves a reflection of at least 20 characters. The field accepts up to 20,000 characters. A draft can be saved and resumed without completing the lesson.

Completion is self-attested and informational. It does not require a teacher grade, staff approval or proof that the planned session duration elapsed. The interview confirms progress is informational; the precise writing-length rule is a prototype behavior.

Content fidelity
All 146 lesson titles and lesson plans come from the four supplied course PDFs. No missing video, assessment or grading workflow is represented as available. The full lesson-title index appears in Appendix A.

04 / FUNCTIONAL SPECIFICATION

Progression & student journeys

Sequential access

Step	Expected behavior
Start a course	Lesson 1 is available. Later lessons remain locked.
Save work	Save a draft without changing the unlocked lesson boundary.
Complete lesson N	Persist completion and unlock lesson N+1 in that course.
Return to earlier material	All completed lessons remain available to read and revisit.
Try a future lesson URL	Server and database checks withhold locked content.
Re-complete a prior lesson	Do not reduce progress or count the same lesson twice.
Study another course	Maintain an independent progression boundary for that course.

School changes do not reset learning

An existing student joining another school keeps the same account, password and course progress. Progress is global for the same material; a school must not create a duplicate progress record. Removing a school membership also preserves that learning record.

Worked example

A student completes lessons 1, 2 and 3 in Yo Soy Nosotros. They can revisit all three and continue to lesson 4. Lesson 5 stays locked until lesson 4 is finished. Joining ABC School does not make them repeat lessons 1-3. None of those online actions creates an in-person attendance mark.

If saving fails, show an error and keep the next lesson locked. If progress cannot be verified, do not infer authorization from a local counter or a URL parameter.

05 / FUNCTIONAL SPECIFICATION

Teacher dashboard

The teacher landing page is **Mi escuela**, with the school name visible in the sidebar and school banner.

Working teacher prototype using a local school and test account. Final visibility must be narrowed to assigned classrooms.

Tools and information

- School summary: active students, attendance records where permitted, completed online lessons and completed courses.
- Searchable roster by student name or email; current prototype page size is 25 students.
- Course selector for displayed progress and individual detail cards for each course, including completed lessons, total lessons and percentage.
- Direct attendance management action where authorized; refresh, loading, no-results and retry states.

Important distinction
The prototype report currently works at school scope. The approved model restricts ordinary teachers to their assigned classrooms, gives school administrators school-wide visibility, and limits attendance to Amigos que evolucionan. Those access changes are pending.

06 / FUNCTIONAL SPECIFICATION

Role definitions

Roles are cumulative. One person may hold platform, school-administration, teacher and student roles simultaneously.

Role	Visibility and authority
Platform administrator	Access all schools' records; create schools; onboard the first school administrator; add/remove students; remove or demote school administrators; archive schools with record retention.
School administrator	Also acts as a teacher. See the entire school; invite teachers/students; promote teachers to school administrator; manage classrooms and assignments; remove teachers/students; manage reflection sharing.
Teacher	Serve one school; see assigned classrooms; share equal access with co-teachers; invite and remove own students. No classroom creation, teacher assignment or student transfers.
Student	See own account, progress, work and attendance only. Join multiple schools, with at most one classroom per school. Cannot leave a school themselves.

Administrator continuity

Every school must retain at least one school administrator. Only the platform administrator may remove or demote a school administrator. A school administrator can promote another teacher to administrator but cannot revoke an administrator role.

Permission checks

Access is determined by authenticated roles and school/classroom assignments. Changing a navigation view or role-preview query must never grant access. A teacher whose assignment or membership becomes inactive must lose the corresponding access.

07 / FUNCTIONAL SPECIFICATION

Schools, classrooms & Amigos

Ordinary school	Amigos que evolucionan
Has classrooms: each is a group of students independent of a course or lesson.	Is a school with no classroom structure. Members belong directly to the school.
A student belongs to no more than one classroom within that school.	Everyone belongs automatically, including staff and people in other schools.
Multiple teachers may share a classroom with equal access.	All authorized Amigos teachers can see all its members.
School administrators create classrooms and assign teachers and students.	Its membership can coexist with all other schools; students still see only their own information.
Teachers have classroom-scoped visibility.	Attendance is available here only.
Students may also belong to other schools.	It is the permanent default school for people signing up without another school assignment.

Example school arrangement

ABC School has a classroom containing Mr. George's ten students. Another teacher may be assigned to the same classroom, with equal access. A student may also belong to a classroom at another school, and remains a member of Amigos throughout.

Governance boundary
School administrators control classroom creation, teacher assignment and student placement or transfer. Teachers can add their own students but do not gain authority to move students between classrooms.

A teacher serves one school. Automatic Amigos membership is compatible with that rule and does not itself grant teaching authority in Amigos.

08 / FUNCTIONAL SPECIFICATION

Invitations & membership lifecycle

Onboarding flow

Stage	Required behavior
School setup	Platform administrator creates the school and invites its first school administrator.
Staff onboarding	School administrator invites teachers by email. Roles apply after invitation acceptance.
Student onboarding	Platform/school administrators and authorized teachers invite students within their scope.
Acceptance	A person must accept before joining the invited school or assuming its invited role.
Existing account	Reuse the account and preserve its password and course progress.
Independent signup	Automatically join Amigos; no separate Amigos invitation is required.

Email invitations replace the withdrawn proposal for temporary-password account provisioning and forced first-login password changes.

Removal rules

- A student cannot leave a school themselves. Their own teacher, school administrator or platform administrator may remove the relevant school membership.
- Student removal retains the account, personal course progress and Amigos membership, and removes the associated classroom assignment.
- School administrators can remove teachers from their school. Platform administrators retain platform oversight.
- Only the platform administrator can remove or demote a school administrator, while preserving at least one administrator for the school.

09 / FUNCTIONAL SPECIFICATION

Attendance & online participation

Attendance and progress are separate measures with different sources of authority.

	In-person attendance	Online progress
Meaning	Presence at an Amigos meeting.	Completion of the same course material online.
Recorded by	Authorized teacher.	Student lesson-completion flow.
Scope	Amigos que evolucionan only.	Personal record that follows the student across schools.
Approval	Teacher records the meeting status.	No grading or staff approval needed.
Effect on the other record	Does not complete or unlock lessons.	Does not mark a meeting attended.

Attendance handling in the prototype

Teachers can mark present or absent for a scheduled session, correct a prior mark, and receive a save confirmation. Duplicate marks update the record rather than inflating counts. Unmarked sessions are not treated as absences. Changes are auditable.

The current prototype supports school-scoped attendance. Restricting the feature to Amigos, as agreed in the interview, remains implementation work. Ordinary schools must not be presented as requiring attendance.

Dashboard interpretation

Student online completion percentage is completed lessons divided by total lessons in that course. Courses with participation have at least one completed lesson. Teacher roster progress across courses uses summed completed lessons divided by summed available lessons, not an unweighted average of course percentages.

A student who misses an in-person meeting can still complete the corresponding learning material online. Their participation advances, while the meeting attendance record remains unchanged.

10 / FUNCTIONAL SPECIFICATION

Reflections & privacy

School-controlled staff sharing

Reflections are private to the student unless a school administrator enables the school setting **Allow staff to read student reflections**. This permission is separate from visibility of informational completion counts.

Setting / condition	School staff access
Sharing disabled	Only the student can read their reflections through that school's sharing mechanism.
Sharing enabled	Assigned classroom teachers and school administrators can read eligible submissions.
Submitted before enablement	Remain private; enabling sharing is not retroactive.
Submitted after enablement	Eligible for authorized staff access within the school.
Amigos teacher scope	Amigos has no classrooms; its authorized teachers have school-wide scope, subject to its sharing setting and cutoff.
Different school	One school's sharing setting does not authorize staff from another school.

Timing example

T1: a student submits a reflection while sharing is off.
T2: the school administrator enables sharing.
T3: the student submits another reflection.

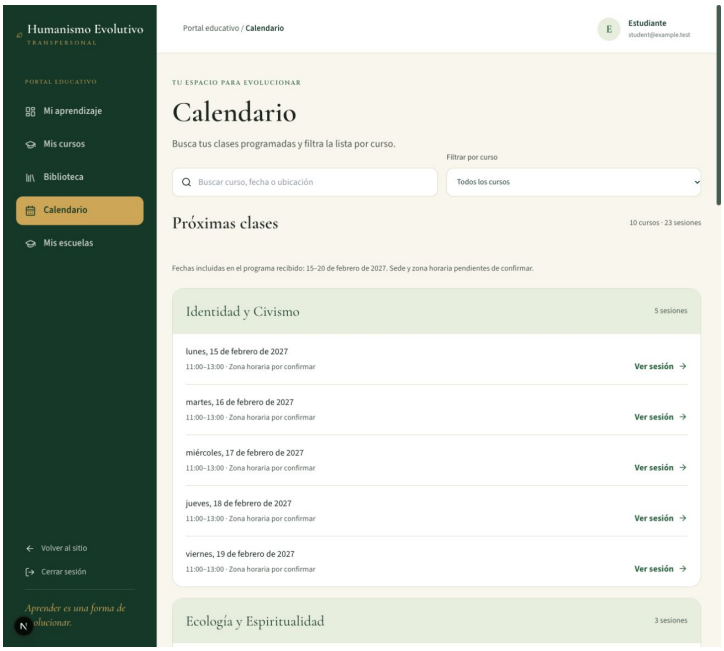

The T1 reflection stays private. Authorized staff may read the T3 reflection. Completion counts remain separate from this sharing rule.

The platform administrator's agreed platform-wide record access is distinct from school staff sharing. The interview did not define edit/resubmission behavior or repeated disable/re-enable cutoffs; those cases require a decision before implementation.

Prototype status: written work is currently owner-only. The school setting and non-retroactive staff-sharing workflow are agreed requirements, not delivered capabilities.

11 / FUNCTIONAL SPECIFICATION

Calendar & learning library

Prototype schedule list: course names are grouped once, with dated sessions beneath them.

Calendario: searchable list

Replace the monthly grid with a list grouped by course. Students and staff can search by course, date or location, combine search with a course selector, clear filters, inspect result counts and open a session detail page. Empty results offer a clear reset action.

The supplied schedule contains 23 dated sessions across 10 scheduled course titles for February 15-20, 2027. This broader school schedule is distinct from the four online courses. No additional recurrence is inferred. Unknown venues or timezones remain marked unconfirmed; floating times preserve the source's wall-clock time.

Biblioteca

Categories include books, podcasts and videos, articles and resources, and Las 51 preguntas. Material detail pages provide the available reader or media experience. Published course links lead to the program without bypassing lesson locks.

12 / FUNCTIONAL SPECIFICATION

Design, security & retention

Visual and interaction design

Keep the established Humanismo Evolutivo design: forest green navigation, warm cream backgrounds, soft green panels, restrained gold accents, rounded cards, serif headings and Source Sans body text. Preserve Spanish navigation labels and clear role-specific landing pages.

Retain responsive layouts, labeled controls, keyboard focus indicators, readable progress values, accessible expansion states and explicit loading, empty, error and save-confirmation feedback. The prototype has been reviewed on desktop; earlier course-reader checks also covered a 390px mobile viewport.

Authorization and personal data

- Require an authenticated non-anonymous account and verify the role and membership scope on the server and in the database.
- Withhold locked lesson text until access is verified. Do not ship all lesson bodies as an unrestricted public asset.
- Apply database row-level security and restricted, validated operations to progress, school records and private work.
- Do not expose one school's students to another school's teachers. Final ordinary-teacher scope is assigned classrooms.
- Do not let students view member lists or self-record attendance. Do not infer permission from preview role selections.

Retention

School archiving is a soft delete: retain the school record and associated history. Membership removal revokes relevant access without deleting the student account or personal learning progress. Amigos membership remains. School-administrator continuity must be enforced during role changes.

The interview did not set a retention duration, data-export policy or account-deletion process. Those are not represented as approved specifications.

13 / FUNCTIONAL SPECIFICATION

Delivery status & remaining work

Status reflects the repository and local prototype, not a production deployment.

Area	Current state
Course catalog and lesson pages	Built in prototype: 4 courses, 146 lessons, saved work and sequential locking.
Student dashboard	Built in prototype: attendance and online progress shown separately.
Teacher landing and progress report	Built in prototype: automatic teacher landing, school name, searchable paginated roster and student progress. Classroom scope is pending.
Attendance tools	Built in prototype with school scope. Amigos-only restriction is pending.
Calendar list and library	Built in prototype with search, course filter and material detail views.
School administrator role	Agreed; role implementation and governance need reconciliation.
Classrooms and co-teachers	Agreed; classroom model and classroom-scoped access need implementation.
Email invitation delivery	Acceptance/membership foundation exists; agreed email onboarding requires reconciliation and end-to-end delivery validation.
Reflection sharing	Owner-only work exists; school setting and submission-time cutoff are pending.
Removal / administrator continuity	Existing membership tools require updates to prohibit student self-leaving, preserve final administrators and match agreed authority.
Release	Remote migrations, QA validation and production release remain required.

Recorded validation for the latest feature work: 50 automated tests, TypeScript, focused ESLint and a webpack production build passed. Browser checks covered progress, attendance, teacher landing, school naming, search, course filtering and private-work exclusion. These checks do not certify the pending interview requirements as implemented.

14 / FUNCTIONAL SPECIFICATION

Acceptance checklist & references

Acceptance scenarios for the agreed product

- A new independent account automatically belongs to Amigos; students never see a member directory.
- Accepting an emailed school invitation adds the authorized membership without resetting password or progress.
- A teacher lands on the school dashboard; co-teachers see the same assigned classroom students and no unrelated classrooms.
- A school administrator sees the whole school, manages classrooms and sharing settings, and cannot demote another administrator.
- The platform administrator cannot leave a school without an administrator and can archive it without deleting records.
- Completing a lesson unlocks only the next lesson in that course. Earlier completed lessons stay available across school changes.
- Only Amigos supports attendance. Online completion and attendance never overwrite or substitute for each other.
- Enabling reflection sharing exposes only eligible later submissions to authorized staff, never earlier work.
- Removing a student revokes that school/classroom access while preserving their account, progress and Amigos membership.

Items still needing a product decision

Reflection edits/resubmissions and sharing disable/re-enable timing; detailed retention/export/account-deletion policies; and any additional content, assessment or certification scope not covered by the supplied programs or interview.

Source of truth and traceability

Approved role and visibility rules: **ROLES.md** (October 22 interview). Prototype behavior and recorded verification: **docs/course-portal/README.md**, the portal components, API handlers and database migrations. Curriculum: **src/generated/course-catalog.json** and the four supplied program PDFs.

Repository baseline: commit **228a9d8**. Review branch: **feature/portal-course-paths**. Pull request: github.com/herzenco/Humanismo_Evolutivo/pull/40.

Images are local prototype screenshots using test accounts. This document contains no production credentials or real student records.

A / FUNCTIONAL SPECIFICATION

Complete lesson index

Appendix A / Introducción a la filosofía de Yo Soy Nosotros

45 lessons • 60 minutes per planned session • Lessons 1-23

01 ¿Por dónde comenzar? Los prólogos y la pregunta del libro

02 La Introducción (I): la crisis de la visión del mundo y el método del ensayo

03 La Introducción (II): la unidad místico-espiritual y los cinco niveles

04 El universo: del big bang al polvo de estrellas

05 La Tierra (I): materia-energía y $E=mc^2$

06 La Tierra (II): física cuántica, ciencia y religión

07 La vida (I): Amón Ra y el Chandogya Upanishad

08 La vida (II): Oriente, Occidente y el inicio de la vida

09 La vida (III): genética, ADN y la necesidad de la muerte

10 La evolución (I): Heráclito, Darwin, Teilhard y el ser humano como fin

11 La evolución (II): el ser humano en el presente y en el futuro

12 El tiempo y el espacio: tiempo científico y tiempo evolutivo

13 La ecología (I): la economía como proceso energético

14 La ecología (II): la complejidad del mundo y el amor como fuerza del equilibrio

15 La filosofía (I): la expulsión del Paraíso y las dos formas de pensamiento

16 La filosofía (II): la modernidad, el consumo y «muchos son los llamados»

17 Grecia (I): de los Siete Sabios a Heráclito y Parménides

18 Grecia (II): Sócrates y Platón

19 Grecia (III): Aristóteles, sofistas, estoicos y epicúreos

20 El cristianismo y sus disidencias: patrística, escolástica, gnosis

21 El neoplatonismo y el Renacimiento

22 La filosofía moderna: racionalismo, empirismo e idealismo inglés

23 Kant y la Ilustración

A / FUNCTIONAL SPECIFICATION

Complete lesson index

Appendix A / Introducción a la filosofía de Yo Soy Nosotros

45 lessons • 60 minutes per planned session • Lessons 24-45

24 El idealismo alemán: Fichte, Schopenhauer, Schelling y Hegel

25 Evolucionismo y vitalismo

26 Socialismo, pragmatismo, fenomenología, existencialismo y el sistema integrador

27 La psicología (I): cinco corrientes y los tres niveles de la mente

28 La psicología (II): impulso, acción y estados de consciencia

29 Las tradiciones espirituales (I): la sociología de la religión y la red de sentidos

30 Las tradiciones espirituales (II): Rama y Krishna

31 Las tradiciones espirituales (III): taoísmo y judaísmo

32 Las tradiciones espirituales (IV): budismo y cristianismo

33 Las tradiciones espirituales (V): el Dreamtime y la tradición mexica

34 Las tradiciones espirituales (VI): Don Juan, Core Energetics y el Cuarto Camino

35 El desarrollo transpersonal (I): qué es y qué no es

36 El desarrollo transpersonal (II): los siete niveles de consciencia

37 Conclusiones: el Vedanta, darse cuenta y «por sus actos los conocerás»

38 Reglas, códigos y valores (I): el imperativo ético

39 Reglas, códigos y valores (II): axiología, valores energéticos y demográficos

40 Reglas, códigos y valores (III): valores ecológicos y económicos

41 El ser humano integral (I): los tres órdenes de Bohm y el yo no localizado

42 El ser humano integral (II): salud, somatización y la única enfermedad

43 Evolucionar es ser (I): el ser, el pecado de origen y el punto de referencia

44 Evolucionar es ser (II): conócete a ti mismo y los métodos

45 Evolucionar es ser (III): la consciencia universal, el epílogo y ¿por dónde comenzar?

A / FUNCTIONAL SPECIFICATION

Complete lesson index

Appendix A / Introducción a Ecología y Espiritualidad

45 lessons • 60 minutes per planned session • Lessons 1-23

01 Prólogo e Introducción: dos ecologías y la conciencia de la experiencia

02 Definiciones: la biosfera y el que se da cuenta

03 Esclarecimientos: interdependencia, la paradoja del temor y lo natural como medio

04 Los obstáculos: siete paradigmas mecanicistas y la nueva visión

05 El imperativo ético: cuatro frases y una deducción ecológica

06 Niveles de conciencia: sobrevivencia, justicia y la pregunta por la factura

07 Ecologistas: tres generaciones y la sonrisa junto al canto

08 Evolución: en el principio era el infierno

09 Desarrollo económico y sustentable (I): todos somos culpables

10 Desarrollo económico y sustentable (II): generaciones, Xel-Há y los ocho paradigmas

11 Espiritual-espiritualidad: manifestación, presencia y la analogía del pintor

12 Religión: compasión, re-ligarse y la ecología como conciencia del otro

13 Transnacionales: llegaron para quedarse y el 90% compartido

14 Globalización: cinco frentes que llegaron para quedarse

15 Libertad: fin del desarrollo y cinco libertades instrumentales

16 Democracia: la forma de la conciencia colectiva

17 Economía (I): la energía como factor común y la alimentación

18 Economía (II): combustibles, hidrógeno y la conducta del «úsese y tírese»

19 El big bang: polvo de estrellas y la definición filosófica de la materia

20 Evolución: la escala del cinco y la experiencia consciente de nuestra esencia

21 Historia: tres revoluciones y el campo que se quedó sin nadie

22 Cultura: la aldea global y el ciudadano del mundo

23 Materialismo, positivismo, escepticismo: la contradicción que se refuta sola

A / FUNCTIONAL SPECIFICATION

Complete lesson index

Appendix A / Introducción a Ecología y Espiritualidad

45 lessons • 60 minutes per planned session • Lessons 24-45

24 Presente y futuro: seis tecnologías y la evolución como método del Espíritu

25 El ciclo del agua: nueve pasos que sostienen la vida

26 El ciclo de la vida: la fotosíntesis, el ADN y el centauro anunciado

27 Las grandes revoluciones (I): fuego, instrumentos, agricultura y escritura

28 Las grandes revoluciones (II): de los imperios al dilema final

29 El nuevo milenio: la lección de Chico Méndez

30 La Tierra: el planeta que fabricó su aire

31 El fin del periodo colonial: la geografía cerrada y las señales ignoradas

32 Primero, tercero y quinto mundos: el retrato de la desigualdad

33 La ecología en mundos desiguales: solidaridad u holocausto

34 El neolítico junto al cosmonauta: la información que rompe barreras

35 Disparidad necesaria: legislar según la historia y la realidad

36 El ser humano y la energía: quién absorbe el costo

37 El desarrollo sustentable integral: análisis y síntesis

38 Errores ecologistas: los siete del capítulo

39 Errores del desarrollo: cheques contra la cuenta de la biosfera

40 Errores sociales: la basura, el coche, la casa sellada y el manatí

41 El centauro: la visión integral del ser humano

42 Los hijos de la Tierra: el dreamtime y la formulación final del imperativo

43 La revolución de las conciencias: darse cuenta y actuar en consecuencia

44 Soluciones: globales, locales y regionales

45 Conclusiones y síntesis: el problema ecológico es un problema del espíritu

A / FUNCTIONAL SPECIFICATION

Complete lesson index

Appendix A / Introducción al Humanismo Evolutivo Transpersonal

45 lessons • 60 minutes per planned session • Lessons 1-23

01 El prólogo del autor: la pregunta que no dejó de inquietarlo

02 La presentación: Julian Huxley y el deslinde de lo transpersonal

03 Las cuatro definiciones: Big Bang, evolución, energía y trabajo

04 Los diez puntos: el origen común y la igualdad potencial

05 Humanismo y religiones: alejarse del instinto, integrar por la fe

06 El imperativo ético y la confusión que el autor quiere deshacer

07 Yo soy nosotros y Evolucionar es ser

08 El empresario como organizador energético y el ego en su doble forma

09 Libre mercado, capitalismo, comunismo y socialdemocracia

10 Los fundamentos: de los griegos a la física cuántica

11 El método: los dos niveles y el concepto de Dios

12 Cuerpo y espíritu: lo que la ciencia explica y lo que queda por comprender

13 La casa en siete pasos: nada existe sin información

14 El Jardín de la Evolución: la realidad y el Big Bang

15 Átomos, tabla periódica y moléculas: el paréntesis que decide todo

16 Los ciclos y la vida vegetal: la evolución que ensaya y recuerda

17 La vida animal y la humanidad: fin y no medio, dignidad infinita

18 Los siete niveles del desarrollo transpersonal

19 La evolución de la civilización: el último segundo del año

20 La energía y la energía nuclear: el trabajo como herramienta del universo

21 La exploración del universo y la evolución tecnológica

22 El análisis del Jardín: somos energía organizada con información

23 Las nueve cualidades: a imagen y semejanza

A / FUNCTIONAL SPECIFICATION

Complete lesson index

Appendix A / Introducción al Humanismo Evolutivo Transpersonal

45 lessons • 60 minutes per planned session • Lessons 24-45

24 Algoritmos mentales, conciencia y consciencia

25 El amor: la fuerza de atracción que dirige la evolución

26 El ego en la historia: del fuego a las clases sociales

27 El Jardín de la Meditación (I): hinduismo, budismo y confucionismo

28 El Jardín de la Meditación (II): las tres monoteístas y los siete puntos

29 Todo es vibración: resonancia, Pitágoras y Tesla

30 Qué hacen las vibraciones al átomo y a la materia

31 Vibraciones sonoras y no sonoras

32 Las vibraciones en los seres vivos: plantas, animales y personas

33 Pienso, luego existo: los tres modos de indagación

34 Wilber y Maslow: las épocas y los métodos de indagación

35 La unidad místico-espiritual: los seis hechos

36 El mapa de Hawkins (I): de la vergüenza al orgullo

37 El mapa de Hawkins (II): del coraje a la iluminación

38 Los planos de consciencia, la advertencia y el ego

39 El espíritu: alma, valores y el nacimiento en el parto

40 El imperativo ético, la energía y la inteligencia artificial

41 El azar y el tablero de Galton

42 Dirección y sentido: las cualidades, el conflicto y los cuatro acuerdos

43 El trabajo como camino: el punto neurálgico

44 La socialdemocracia humanista y el Tercer Mundo

45 Síntesis: los cinco libros y la respuesta a la pregunta inicial

A / FUNCTIONAL SPECIFICATION

Complete lesson index

Appendix A / El arte de ser empresario

11 lessons • 120 minutes per planned session • Lessons 1-11

01 El impulso evolutivo y la razón de ser empresario

02 La lucha de los opuestos y el empresario como organizador energético

03 Capital, trabajo y valor: la medida energética de la empresa

04 Mercado, riesgo y el laboratorio cubano

05 Conciencia, bien común y medio ambiente

06 Cómo progresan los pueblos: cinco ejemplos y los datos duros

07 Idealismo, ego y vocación: el código ético del buen empresario

08 El imperativo ético y las condiciones del libre mercado

09 El perfil del empresario: conocimiento, liderazgo y finanzas sanas

10 Virtudes del empresario, riesgo y la dignidad de todo trabajo

11 ADN, espíritu y la prueba de una vida

This appendix lists the complete 146-lesson opening curriculum. The portal contains the full lesson plans; this client specification is not a replacement for the teaching manuals.
